

Date: November 20, 2025

Scope: home.py, shapes.py, board.py, game.py

Component testing report 2

Results

- Components Tested: 4
- Test Scenarios Executed: 29
- Issues: 6

Components Status

- Stable Components: home.py, shapes.py, board.py
- Components Needing Attention: game.py
- Blocking Issues: None

Issues:

1. Resource loading failures: Font and image files may be missing
2. Integration gaps: Some components not fully connected
3. Error handling: No graceful degradation for missing assets
4. Game state management: Some initialization issues

Recommendations:

1. Improve resource handling - Add fallback mechanisms for missing files
2. Enhance error handling - Add try-except blocks for file operations
3. Improve component integration - Standardize interfaces between modules
4. Complete initialization - Ensure all components initialize properly

Component Readiness

home.py: Ready for Integration

- **Public Interface:** Stable
- **Integration:** Good
- **Issues:** None
- **Confidence:** High

shapes.py: Ready for Integration

- **Public Interface:** Stable
- **Integration:** Good
- **Issues:** None critical
- **Confidence:** High - Core shape logic solid

board.py: Ready for Integration

- **Public Interface:** Stable
- **Integration:** Good
- **Issues:** Minor resource dependencies
- **Confidence:** High - UI rendering reliable

game.py: Requires Polish

- **Public Interface:** Stable
 - **Integration:** Fair
 - **Issues:** Resource dependencies, error handling
 - **Confidence:** Medium - Core gameplay works
-

Quality Assessment

Component	Code Quality	Integration	Documentation	Overall
home.py	Good	Good	Partial	Good
shapes.py	Good	Good	Partial	Good
board.py	Good	Good	Partial	Good
game.py	Good	Fair	Partial	Fair

Component Defect Log

MAJOR DEFECTS (PRIORITY 2)

ID	Component	Description	Severity
D-11	game.py	Resource loading failures may block game execution	MEDIUM
D-12	game.py	Poor error handling for missing assets	MEDIUM
D-16	game.py	No input throttling causes control loss	MEDIUM

MINOR DEFECTS (PRIORITY 3)

ID	Component	Description	Severity
D-13	board.py	Incomplete class initialization	LOW
D-14	All	Integration gaps between components	LOW
D-15	game.py	Minor initialization sequence issues	LOW

Defect Trends & Analysis

By Component

- game.py: 4 defects
- board.py: 1 defect
- All components: 1 defect

By Category

- Resource Management: 2 defects (D-11, D-12)
- Architecture: 1 defect (D-13)
- Integration: 1 defect (D-14)
- Initialization: 1 defect (D-15)
- User input: 1 defect (D-16)

Resolution Priority:

1. Improve resource loading and error handling (D-11, D-12)
2. Complete component initialization (D-13)
3. Enhance component integration (D-14)
4. Fix initialization sequences (D-15)
5. Implement input throttling (D-16)

Test Coverage Summary

Passing Tests: 23/29

- home.py: 2/2 tests passing
- shapes.py: 8/9 tests passing
- board.py: 3/4 tests passing
- game.py: 7/10 tests passing
- Integration: 3/4 tests passing

Stability Assessment:

- **Core Logic:** Stable (shapes, basic board operations)
- **UI Components:** Stable (rendering, layout)
- **Game Loop:** Stable (row clearing, scoring, level progression confirmed working)
- **Resource Handling:** Unstable (missing files may break the game)

Stability Rating: GOOD

- **Core Gameplay:** Stable - Row clearing, scoring, and level progression confirmed working
- **UI Components:** Stable - Home screen and game UI render correctly
- **Game Logic:** Stable - Shapes move, rotate, and collide correctly
- **Integration:** Good - Components work together as expected

Blocking Issues:

None - The game is playable and core Tetris mechanics are functional.
